

The FriendZ Network

The next generation, privacy respecting, disruptive social network that in-fact respects the rights and privacy of its members.

ORLANDO, FL – July 7, 2021 – Are you one of the millions of Americans who are tired of seeing your favorite social media posts disappear? Join The FriendZ Network! Upstart, The FriendZ Network is the fast-growing, anti-Facebook platform with data privacy, free speech and no ads.

“Social media should be about conversations, community, and connecting - NOT censorship. Our mission is to protect America and free speech while providing a safe, secure platform where you can connect with family and friends, and engage in respectful debate.” – The Friendz Network

The FriendZ Network is the fun social platform that allows you to authentically communicate online the same way you do offline: with people you know and like and with people with whom you share common interests and hobbies. The platform is built on trust, freedom, and love for social media users worldwide.

The FriendZ Network's growth is due to multiple factors, including backlash against privacy violations and widespread censorship from Facebook, Twitter, and other social sites against conservatives, African Americans, LGBTQ, alternative health advocates, and others.

The platform promises to protect user's privacy and right to free speech. The Friendz Network is unique in that users own their own data on the network -- you have complete control over the data on your newsfeed and timeline. And in a clear dig to Facebook, this cutting-edge new platform will NEVER sell any personal information to third-party providers.

The Friendz Network also promises not to target users with advertisements. Unlike Facebook or Twitter, the network won't monitor or regulate its user's activity. They also vow to abide by no commercial or political bias. Additionally, there is no facial recognition or censorship.

“The FriendZ Network members are customers to serve, not data to sell.”

The New Social Network

Ask the average person what they dislike most about social network platforms and the answers are pretty consistent: massive amounts of advertising, how algorithms determine what you see in your feed, censorship and bias, and all of the personal data these companies gather from their users.

Enter The FriendZ Network: A new, free social network that changes the status quo. The FriendZ Network is banking on the idea that people's desire to stay connected while maintaining absolute control over their private information will help the platform thrive.

Is The FriendZ Network Free?

Yes. You sign up for free and have access to all the features, including news feeds, chats, cloud storage, and more.

About The FriendZ Network

The FriendZ Network allows connection in real time, with no interference from advertisements or algorithms, and no need to pay to boost content. No Ads, No Targeting, No BS. Member data is #NotForSale.
